

Muskogee Cimeter.

W. H. TWINE, Editor.

MUSKOGEE, . . . IND. TER.

NEW STATE NEWS

Rev. is now in the midst of a big revival. Rev. Crouch of Bristol, Tenn., is conducting the services.

Prague has this season shipped about fifteen car loads of potatoes, bringing into the section nearly \$5,000.

The farmers' institute meeting announced for Chandler August 9th and 10th has been indefinitely postponed on account of the busy season.

The rains of last week have greatly benefited the cotton crop in both territories. At some points the crop would have been a failure but for the showers.

Pryor Creek has raised a \$25.00 bonus for the Oklahoma & Cherokee Central railroad.

The Western Negro Press association met in Guthrie. The membership comprises all negro newspaper men west of the Mississippi.

The Oklahoma millers met at El Reno last week. The question of better seed wheat was discussed.

Dr. J. C. Bushyhead has been appointed a pension examining surgeon at Claremore.

The postoffice at Boyer, Pottawatomie county, has been discontinued. Mail has been ordered sent to Waukegan.

Muskogee streets are to be paved with brick. A Guthrie contractor has the work.

Max Mullins of Lexington, who killed a negro on the streets of that town last week, has been acquitted by the coroner's jury returning a verdict of justifiable homicide.

The retail butchers and grocers of Anadarko have perfected an organization.

The gypsum plaster manufacturing plant near Watonga has been sold to an Oklahoma City firm for \$48,000.

The franchise of the Southwestern base ball league has been transferred from Shawnee to El Reno.

Enid announces that there will be no gambling on the streets during the street fair at that place.

Old soldiers' day at Prague, which has been advertised to be on the 26th of August, has been changed to the 23rd on account of the governor being present on that day.

Muskogee is to have an artificial gas plant. A local company is to install a \$60,000 plant.

Work on Anadarko's \$36,000 water works plant has begun and the construction will be pushed rapidly. The contract calls for completion within three months.

The Lion Store at Oklahoma City offers \$15 in cash for the best six ears of corn raised by any farmer in Oklahoma and Indian Territory. Also a cash prize of \$5 for the best half dozen ears of corn raised by any farmer in Oklahoma, Logan, Pottawatomie, Cleveland, Canadian and Lincoln counties, in Oklahoma. A prize of \$3 for the second best, and one of \$2 for the third best. Corn must be delivered at the Lion Store in Oklahoma City free.

ROSE HAS MANY COLORS.

Peculiar Flower the Production of Eastern Gardeners.

The Chinese, Japanese and Siamese are peculiarly skillful at botanical feats. One of their wonderful achievements is known as the "changeable rose." The bloom is white in the shade and red in the sunlight. After night or in a dark room this curiosity of the rose family is a pure waxy-white blossom. When transferred to the open air the transformation immediately steps in, the time of the entire change of the flower from white to red depending on the degree of sunlight and warmth. First the petals take on a kind of washed or faded blue color, and rapidly change to a faint blush of pink. The pink gradually deepens in hue until you find that your lilly-white rose of an hour before is as red as the reddest peony that ever bloomed.

Still More Evidence.

Bay City, Ill., August 8 (Special).—Mr. K. F. Henley of this city adds his evidence to that published almost daily that a sure cure for Rheumatism is now before the American people and that that cure is Dodd's Kidney Pills. Mr. Henley had Acute Rheumatism. He has used Dodd's Kidney Pills. He says of the result: "After suffering for sixteen years with Rheumatism and using numerous medicines for Rheumatism and more medicines prescribed by doctors, I at last tried Dodd's Kidney Pills with the result that I got more benefit from them than all the others put together.

"Dodd's Kidney Pills were the only thing to give me relief, and I recommend them to all suffering from Acute Rheumatism."

Rheumatism is caused by Uric Acid in the blood. Healthy kidneys take all the Uric Acid out of the blood. Dodd's Kidney Pills make healthy kidneys.

Difference in Bacilli.

In consequence of the discovery by Prof. Schroen that the bacillus of consumption is not the same as that of tuberculosis, it is held in German medical circles that the present treatment of consumption will be radically changed.

More Flexible and Lasting

Don't shake out or blow out; by using Deffiance Starch you obtain better results than possible with any other brand, and one-third more for same money.

Marsh Bankruptcy Laws.

A merchant in Russia can be declared bankrupt if his liabilities exceed \$1,000 and he has not the ready cash to meet them. He can be arrested, and his detention depends on the will of his creditors.

A Trip to Colorado, Utah or California is not complete unless it embraces the most beautiful resorts and grandest scenery in Colorado, which are found on the Colorado Midland Railway, the highest standard gauge line in the world. Exceptionally low summer round trip rates to Colorado interior state points, Utah, California and the Northwest are offered by this line. For information address Mr. C. H. Speers, General Passenger Agent, Denver, Colo.

Inhabitants of Claro.

The inhabitants of Claro, a Swiss village, met in general assembly and passed a resolution informing the ecclesiastical authorities that they (the villagers) would become free-thinkers unless the village cure, who was unpopular, should be removed.

\$36.00 per M. Lewis' "Single Binder," straight 5c cigar, costs more than other brands, but this price gives the dealer a fair profit—and the smoker a better cigar. Lewis' Factory Peoria, Ill.

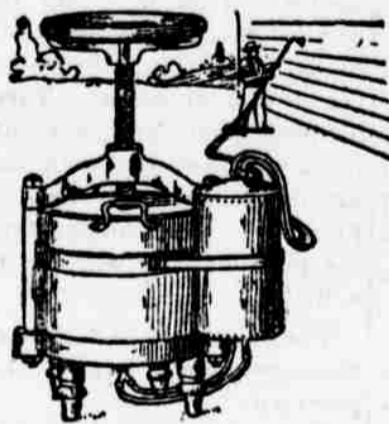

Midget Japanese Soldiers.
The average Japanese soldier is not more than 5 feet 4 inches high.

SCIENCE and INVENTION

Paint and Cleaning Machine.

Out in the country, where the smoke and dust from factories and paved streets is unknown, it is comparatively easy to keep a house looking bright and clean on the outside, even when it has been standing several years. But in the city, where all is dust and smoke, a newly erected stone building or a freshly painted frame structure soon shows the effects of the dirt-laden atmosphere.

A Canadian inventor has just designed an apparatus intended for use on frame structures, where the paint has become dingy and in case the owner does not feel that he can stand

Combines the Soap and Water.

the cost of fresh painting. This machine, which is here illustrated, has a water reservoir, an air compressor and a soap-containing chamber, together with lines of hose and scrubbing brushes. The idea is to mix the soap and water while under pressure and before it is discharged into the bristles that it shall be of the proper consistency to scrub the painted surface to which it is applied. This treatment would seem to necessitate first-class waterproof paint, though perhaps even poor paint would stand against a weak mixture and light scrubbing with the brush. In the case of stone work the laborer need have no scruples about exerting his strength, as it is impossible to injure the hard face. There is obviously no necessity for transporting a bucket of cleansing liquid around on ladders and scaffolding, as heretofore, the cleaning fluid being pumped directly into the brush where it is to be applied. The pressure is easily controlled by means of the valves in the handle of the brush, as is also the proportion of soap and water.

The inventor is Emile Wegland dit Labonte of Montreal, Quebec.

New Polar Current Theory.

The latest word in meteorology is brought from the international meteorological committee, which will render it necessary, it is said, to abandon once for all the theory hitherto adopted of a vertical circulation of the atmosphere between the tropics and the poles. Dr. H. H. Hildebrandson, who makes a report, expressed the hope that the terms "polar" and "equatorial" currents, which have hitherto caused so much confusion in dynamical meteorology, will disappear completely from meteorological science.

He shows that in all parts of the temperate zone of the northern hemisphere an upper current from west to east prevails in all months of the year, while in the tropical zone the currents at all heights are almost without exception from east to west.

New Variable Stars.

During an examination of photographic plates taken by M. Blojko at the Moscow university, M. Ceraski detected three new variable stars. The first, Cassiopeiae, varies from the ninth to the eleventh magnitude; the second, Lyrae, varies from the tenth to the twelfth; and the third, Lacertae, varies from the ninth to the tenth, and probably is of short period.
